A cute analyst character wears fortune-teller robes and peers into a crystal ball showing a rising demand curve. Behind them, warehouses are already stocked and ready. Competitors scramble last-minute. Chinese text "需求还没来 我已准备好" at the bottom. Small annotation "cip = 提前抓住" near the root. Apart from the English phrase itself, all other text in Chinese only.

Prompt: Cute flat illustration, warm pastel colors, orange accents, clean background, humorous. The English phrase "ADAPT THE PRODUCT RANGE" displayed prominently, with "ADAPT" in bold orange (same root as adapt to: ad+apt = toward+fit). A cute product lineup stands in a row. A manager stretches the lineup like an accordion — adding new products, removing old ones, reshuffling the order. The lineup morphs and transforms fluidly. Chinese text "产品线 随时调整" at the bottom. Small annotation "apt = 适合" near the root, callback to adapt to. Apart from the English phrase itself, all other text in Chinese only.
